

Shift Electrician Fairview Mill

Basic Salary: £37,326

Overtime: x 1.5

Additional Benefits: Company Pension, Life Assurance, Discretionary Bonus Scheme.

Shift Pattern: 42 hours per week on average, working 4 shifts of 12 hours on a 4 on 4 off pattern. You will be required to work both day and night shift and be part of the on-call rota.

2Agriculture are offering an exciting opportunity for a Shift Electrician to join the team based at Fairview Mill on a permanent basis. It is a fantastic time to join 2Agriculture and play a key role in realising our ambitious growth plans.

About 2Agriculture

2Agriculture is an independent milling business which has been supplying feed to the poultry industry for the past 50 years.

Every day here at 2Agriculture we work with talented, dedicated colleagues to produce sustainable, premium quality feed enabling our farming partners achieve the highest standards of poultry and positively impact on our health, communities and the environment.

Service is at the heart of the team at 2Agriculture where over 250 employees work across five sites. Our feed mills operate to the highest standards set for product quality, with a specialist production team monitoring output ensuring zero or minimal mill downtime. Our fleet of over 40 Lorries operate 24/7 ensuring feed arrives on time and in full, with a real focus on biosecurity prior to delivery, on site and during departure.

Role Profile

The Shift Electrician carries out all aspects of electrical plant maintenance and repairs to ensure the effective and efficient operation of the mills production and intake systems, in order to minimise downtime and deliver business objectives.

Day to day your duties will include proactively carrying out electrical plant maintenance to a planned schedule, seeking solutions where abnormalities occur to prevent a negative impact on production and quality standards. This will involve ensuring all relevant electrical maintenance records are accurately recorded to maintain legal compliance and a safe working environment. You will work closely with the mill production team to address breakdowns or interruptions to production, dealing promptly with any issues and escalating when necessary. You will continually assess requirements and co-ordinate with the mill management team to allocate resources to meet changing business and customer needs whilst maintaining adequate engineering resource of materials and equipment. You will be required to make sure all works meet budgeted costs and that timescales are met, escalating any discrepancies.

Person Specification

To be successful in this role you should have strong, demonstrable experience as an Electrician within a team-based manufacturing or production environment, if this is within a medium to heavy engineering manufacturing environment, such as Milling, Quarries, Biomass etc this would be advantageous. A Qualification or Apprenticeship in a relevant field is essential and you should be 17th Edition certified at minimum. You should have good experience and understanding of both Health & Safety and Environmental regulations and their impacts. In addition you should be computer literate and hold experience of working with Microsoft programmes.

We are looking for someone who works effectively as part of a team and collaboratively with other operational areas to meet increasing productivity and quality targets, whilst producing new ideas, approaches or insights, with a range of solutions to problems. A vital aspect of the role is having a strong attention to detail whilst working in a fast-paced and dynamic environment, having a heightened awareness of personal safety and a good understanding of safe working practices within an Electrical Engineering role.

If you are interested in applying for the post, please send your CV and cover letter to HR@2agriculture.com. Please note, due to the volume of applications we will only be contacting the candidates selected for interview.
