

## **2Agriculture Engineering Modern Apprenticeship**

### **Fairview Mill, Ingliston, EH28 8NB**

#### **Job Overview**

2Agriculture are offering an exciting opportunity for an apprentice to undertake a 4-year Engineering Modern Apprenticeship through West Lothian College starting in August 2022.

This is a fantastic opportunity to become a fully proficient multi-skilled Technician and gain on the job knowledge and experience of all operational areas within a successful manufacturing business. 2Agriculture is a rapidly growing business within the poultry sector and is a leading provider of poultry feed within the UK.

Candidates will finish their apprenticeship as a multi-skilled Technician with systems process, mechanical and electrical disciplines. In addition, they will have gained experience of key operational areas within the business, such as hygiene, quality control, health and safety and production. This will demonstrate how each area has a key role in maintaining and developing our feed mill to the highest standards to contribute to the overall success of the business.

#### **Key Responsibilities**

During year 1 and 2 candidates will attend college one day per week, to work towards their academic qualification (NC or HNC) this will wholly depend on what qualification they already hold.

When at work during year 1, the candidates will work towards achieving their SVQ2 in Performing Engineering operations. Then during year 2 and 3 they will move on to their trade specific SVQ3 in Engineering Maintenance. When candidates have achieved a SVQ2 and SVQ3 they will receive their Technical Level Modern Apprenticeship papers in Engineering Maintenance.

Based at our current Mill in Edinburgh, candidates will be asked to;

- Implement all Health and Safety policies and procedures ensuring compliance with legislation.
- Support the engineering team to carry out all aspects of plant maintenance and ensure all relevant maintenance records are accurately recorded.
- Liaise with the mill production team to address breakdowns, dealing promptly with any issues.
- Carry out the production of high-quality poultry feed in accordance with Standard Operating Procedures.
- Liaise with the Hygiene team to ensure the working environment is safe and clean to prevent a negative impact on quality standards.

## **Qualification and Skills Required**

- Minimum Standard Grade level 3 or equivalent National 4 level in Maths, Science and English.
- Good interpersonal skills and ability to communicate at all levels.
- Works effectively as part of a team.
- Self-motivated.
- High level of enthusiasm.
- Can do approach.
- Computer proficient.

If you are interested in applying for the vacancy, please send your CV and cover letter to [HR@2agriculture.com](mailto:HR@2agriculture.com).
