

Mill Technician Llay Mill, Wrexham

Salary: £37,060

Overtime: x 1.5

Additional Benefits: Company Pension, Life Assurance, Annual Discretionary Bonus Scheme, Employee Discounts & Savings Scheme.

Shift Pattern: 42 hours per week on average, working 4 shifts of 12 hours on a 4on 4off pattern. You will be required to work both days and nights.

Contract: Permanent

2Agriculture are offering an exciting opportunity for a Mill Technician to join the team at Llay Mill on a permanent basis. It is a fantastic time to join 2Agriculture and play a key role in realising our ambitious growth plans.

About 2Agriculture

2Agriculture is an independent milling business which has been supplying feed to the poultry industry for the past 50 years.

Every day here at 2Agriculture we work with talented, dedicated colleagues to produce sustainable, premium quality feed enabling our farming partners achieve the highest standards of poultry and positively impact on our health, communities and the environment.

Service is at the heart of the team at 2Agriculture where over 250 employees work across five sites. Our feed mills operate to the highest standards set for product quality, with a specialist production team monitoring output ensuring zero or minimal mill downtime. Our fleet of over 50 Lorries operate 24/7 ensuring feed arrives on time and in full, with a real focus on biosecurity prior to delivery, on site and during departure.

Role Profile

The Mill Technician carries out all aspects of the mill production system, ensuring all relevant Health & Safety and quality control procedures relating to the production of compound animal feed are adhered to. In addition, they conduct basic level routine maintenance and repair to ensure the effective operation of the mill production and intake systems in order to minimise downtime and deliver business objectives.

Your daily duties will include conducting stock takes and completing statutory records and production sheets, proactively seeking solutions where abnormalities occur, whilst carrying out the production of compound animal feed, ensuring you are maximising throughput and feed quality. This will involve operating heavy duty machinery, ensuring compliance with quality control and Health and Safety procedures at all times. You will conduct basic level routine maintenance on this machinery, dealing promptly with any issues and escalating to the engineering team where necessary.

You will be required to operate in self-management teams, and take responsibility for core decision making during day to day activities, leading and implementing key projects and initiatives as required in order to deliver business objectives. You will also consistently liaise with the Hygiene team to ensure environment is safe and clean to prevent a negative impact on quality standards.

Essential Skills and Experience Required

In order to be successful in this role you should have strong experience within a team-based manufacturing/production environment, working with strict safety and quality control procedures and KPI's. You will hold a minimum GCSE Level 4 or equivalent in Maths and English, preferably with a qualification/apprenticeship in a relevant field.

We are looking for someone who demonstrates an interest and understanding of others, adapting to the team and listening, consulting and communicating proactively and effectively. You should show a strong attention to detail whilst working in a fast-paced and dynamic environment.

If you are interested in applying for the post, please send your CV and cover letter to HR@2agriculture.com. Please note, due to the volume of applications we will only be contacting the candidates selected for interview.
